

FAQ

Do you need help in Haiti?

Thank you so much for your willingness to help with Haiti.

At the moment, our on-the-ground team has begun providing aid and distribution of food and water through our medical clinics. The biggest need that they have communicated is for medical professionals only, especially surgeons.

Due to the sheer amount of destruction of government buildings and hospitals, building and other teams will be sent later on as we're unable to know at this point when we will have access to building equipment and materials.

If you are a medical professional contact Lindsey Davies at lindseyd@globalaid.net as she collecting names and will also determine when the medical team(s) will be sent.

If I give to Global Aid Network, will my donations be matched?

Yes. All donations made by an individual to GAIN's relief work in Haiti by February 12th are eligible for the Canadian Government matching funds.
